## DETAILED ACTION

### ***Information Disclosure Statement***

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 13 has two periods (1<sup>st</sup> character, line 2 and terminal position). It is unclear which of the two sentences so defined constitutes the claimed invention.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 54 is rejected under 35 U.S.C. 102(b) as being anticipated by Martens et al (Tetrahedron, Stereochemistry and Mechanism of Acylation of Acetylenes, 1975, 31(2), pages 177-183). Martens discloses (Page 178, bottom, Table 2, entry 5) the compound acetyl triflate which corresponds to the instantly claimed compound. Martens therefore anticipates claim 54.

***Allowable Subject Matter***

4. Claims 1-12 and 14-53 are allowed. Claim 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Fujiwara et al (JP 10-226665 08-1998, machine translation) teaches (Machine translation, paragraphs [0020]-[0022]) a process for the production of acetic acid, under anhydrous conditions, from methane and carbon dioxide in the presence of VO(acac)<sub>2</sub> and K<sub>2</sub>S<sub>2</sub>O<sub>8</sub> in trifluoroacetic acid as solvent. Fukiwara also teaches (Machine translation, paragraph [0005]) that vanadium pentoxide (V<sub>2</sub>O<sub>5</sub>, vanadic anhydride) may be employed instead of VO(acac)<sub>2</sub>. The Examiner considers vanadium pentoxide to meet the limitation of an acid anhydride. Fukiwara teaches (Machine translation, paragraph [0014]) reaction at 80°C.

Fujiwara, however, does not teach the use of his process for the formation of an acetyl anhydride or acetate ester. In addition, although Fujiwara does teach the production of acetic acid the use of water is not required in Fujiwara's process and one of ordinary skill in the art would not, therefore, be motivated to contact the product of Fujiwara's reaction with water.

The instantly claimed processes are therefore patentable over the teachings of Fujiwara, the closest prior art.

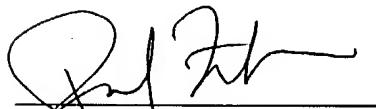

***Conclusion***

5. Claims 1-54 are pending. Claims 13 and 54 are rejected. Claims 1-12 and 14-53 are allowed.
